

# ISHIKAWA

Stirring Grinding

Mixing Pounding

Grinding and mixing of infinitesimal amount of materials

Compatible to vacuum

Adjustment of analysis

## ISHIKAWA grinding mixer AGZ type (agate mortar)

- Installed vacuum cover to AGA type.
- Advantages of under vacuum  
(Grinding mixing does not oxidize and hard to create foams.)
- Inverter installed standard. Possible to set rotation for variable speed and duration of the operation.

▲AGZ type

### Features of ISHIKAWA

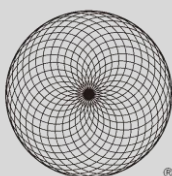

ISHIKAWA grinding and mixer is the only machine that can “stir”, “mash-crush”, “mix”, and “pounding” simultaneously in the world. With the unique fundamental structure enables to high density uniformly particle size and mixing, and it contributes to the finished products. We received acclaim from many customers our method led to save processing time and energy.

### ■ Specifications

style	Rotation method	Agate mortar			Outer machine size			Power source Three phases 100V (kW)	# of pestle	spatula	weight (kg)
		Inner radius (mm)	depth (mm)	volume (ℓ)	length (mm)	width (mm)	height (mm)				
AGZ type	FR type (※1)	120	30	0.05	650	430	1,400	0.2	1		-

(※1) rotation method “FR type” : no mortar rotates. A function gear torque has evolve and rotate a pair of pestles and rotate each pestle separately.

As of August, 2015.
